

DEMONSTRATION IN ROSTOCK

18 SEPT 2021

The past years have revealed immense political and social wrongs: the gap between rich and poor is widening, only exacerbated by the pandemic. There is no end to hostility from the political right and the deaths at the EU's external borders. The climate crisis is increasing global inequalities and housing is becoming a luxury.

But in Mecklenburg-Vorpommern, too, many of us are raising our voices indivisibly against all of this.

We stand for a society of gender equality and inclusion in which everyone can participate equally.

We stand united against racism, anti-Semitism and anti-feminism!

We demand a consistent, responsible and just climate policy.

We demand decent working and living conditions, education, health care and housing policies that are not regulated by the conjuncture of the market - no matter whether urban or rural.

We stand up for the right to protection and asylum - locally and worldwide. Human Rights are not negotiable!

We want a just society, a society of solidarity, an indivisible society: diverse, feminist and sustainable. That's what we are taking to the streets for on September 18th!

In the run-up to the state and federal elections, we will make our interconnectedness and solidarity visible. From the state and the cities, from all over Mecklenburg and Western Pomerania, we will come together at 2 pm in Rostock at the main train station. At the end of the demonstration, there will be a final rally and a concert in the city harbour.

We are #unteilbarMV - over 200 signatory initiatives from all over the state and everyone who believes in a colourful MV of tomorrow.

#UNTEILBARMV
